Waste Water

Submersible Mixer

Amaprop

Main applications

In environmental engineering, particularly for treating municipal and industrial waste water and sludges. For circulating, keeping in suspension and inducing flow:

- In nitrification and denitrification tanks
- In activated sludge tanks
- In biological phosphate elimination tanks
- In flocculation tanks
- In sludge tanks

Operating data

Overview of operating data

Characteristic			Value	
			Amaprop 1000	Amaprop 1200 ... 2500
Nominal propeller diameter	D	[inch]	40	48 - 100
		[mm]	1000	1200 - 2500
Power	P	[hp]	13 - 26	1.7 - 8.6
		[kW]	10 - 20	1.25 - 6.5
Installation depth	H	[ft]	Up to 36 ¹⁾	
		[m]	Up to 12 ¹⁾	
Operating temperature	t	[°F]	Up to 113	Up to 104
		[°C]	Up to 45	Up to 40

¹⁾ Larger installation depths on request

Designation

Example: Amaprop V 29-2500/2 4 UR G

Key to the designation

Code	Description

	UR Standard design
	XR Explosion protection to NEC 500
G	Housing material
	G Grey cast iron

Design details

Design

- Fully flooded submersible mixer
- Horizontal installation

Propeller type

- Self-cleaning (ECB) propeller

Shaft seal

- Two bi-directional mechanical seals in tandem arrangement, with liquid supply chamber
- Additional leakage chamber between the mating ring holder and the gear unit

Bearings

- Grease-packed rolling elements bearings (sealed for life) in the motor
- Oil-lubricated rolling element bearings in the gear unit

Drive

- Three-phase asynchronous squirrel-cage motor

Variant with explosion protection to NEC 500: "Explosionproof for Class I, Division 1 Groups C and D, T3, hazardous (classified) locations".

- Stability and even longer service life with AmaRoc accessories made of the innovative NoriRoc material
- Leakage chamber between oil chamber and gear unit for high reliability
- Easy to install

Materials

Overview of available materials

Part No.	Component	G	
		Amaprop 1000	Amaprop 1200 ... 2500
811	Motor housing	A 48 Class 40 B	
812	Motor housing cover	A 48 Class 40 B	
870	Gear housing	A 48 Class 40 B	
476	Mating ring holder	A 48 Class 40 B	
23-9	Propeller	Glass fibre reinforced epoxy resin	
433.01	Mechanical seal	SiC/SiC	
433.02		SiC/SiC	
-	Propeller shaft	A 276 Type 440	
-	Elastomer seals	FPM	
-	Screws/bolts	A 276 Type 316 Ti	
-	Guide bracket	A 48 Class 40 B, plastic-lined	A 536 Class 60-40-18, plastic-lined

Glass fibre reinforced epoxy resin

The high-performance composite material consists of glass fibre reinforced epoxy resin, a metal hub insert and a protective gel coating which is resistant to abrasion and chemicals.

Comparison of materials

EN	ASTM
JS 1030	A 536 Class 60-40-18
JL 1040	A 48 Class 40 B
1.4122	Similar to A 276 Type 440
FPM	FKM

Coating and preservation

Primer and top coat

Surface treatment: SA 2 1/2 degree of cleanliness to DIN EN ISO 12944

Primer coat: 2-component epoxy resin zinc phosphate primer, min. film thickness = 1 1/2 mils [35 µm]

Top coat: 2-component high-solid epoxy resin top coat (RAL 5002), min. film thickness = 4 mils [100 µm]

Special coating

Available from the manufacturer on request (a surcharge and longer delivery time apply).

Product advantages / customer benefits

- Absolutely unbreakable propeller blades made of glass fibre reinforced epoxy resin with metal hub insert and protective gel coating
- Two bi-directional mechanical seals with oil reservoir filled with ecologically acceptable oil provide double safety
- Perfectly protected by absolutely water-tight cable gland protecting the motor against moisture
- Motor monitored by temperature sensors to prevent it from overheating

Acceptance tests / warranties

- Functional test
Every submersible mixer is subjected to a functional test to KSB standard ZN 56525.
- Quality is assured by means of an audited and certified quality assurance system to DIN EN ISO 9001.
- Special acceptance tests are available on request.

Warranty information

Our warranty is based on and exclusively applies to your specifications as documented in the data sheet of the submersible mixer, and covers the relevant physical properties. Any warranty claims beyond the aforementioned aspects, as well as any claims resulting from an excessive solids content in the plant, the formation of floating blankets as well as failure to produce a specific gas yield, shall be excluded. The correct positioning of the submersible mixers is crucial for the overall function of the equipment. KSB's warranty obligations shall not cover any damage that may occur as a result of incorrect mixer positioning, i. e. installing the mixer in a position not expressly approved by KSB. In addition, low-flow areas (flow separation) resulting from the tank geometry shall not be covered by our warranty. Furthermore, we shall not assume any liability if our submersible mixers are used in patented processes and/or in case of protected rights of third parties.

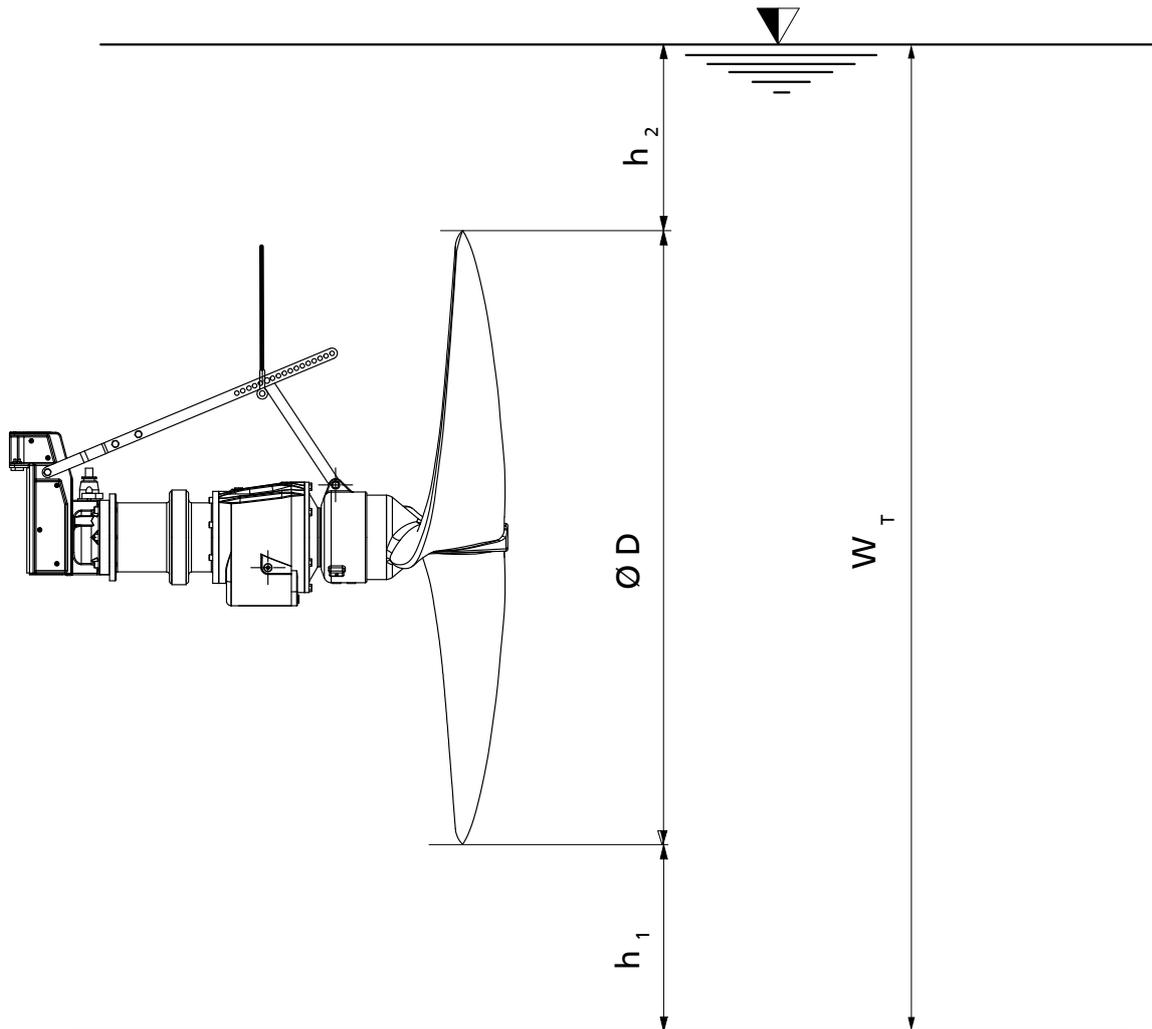

Design and selection information

- The fluid properties specified in the data sheet of the submersible mixer provide the basis for selection and positioning of the equipment.
- Good mixing results and safe and reliable operation of the submersible mixers essentially depend on the position of the mixers in the tank and relative to each other. It is therefore imperative to position the submersible mixers as shown in KSB's general arrangement drawing. KSB shall not be held responsible for any damage resulting from mixer positions not expressly approved by KSB.
- The minimum and maximum submergence indicated in the data sheet of the submersible mixer must be complied with. The propeller must not be operated outside the fluid. Air-entraining vortices must be avoided. Always use level control equipment which trips the submersible mixer if the fill level drops below the minimum operating level.
- For servicing the submersible mixers, access openings and appropriate means of removal must be provided, so that the mixers can be lifted out of the filled tank at any time. For this purpose, the minimum dimensions for removing the submersible mixers as specified in the type series booklet must be observed.
- For higher fill levels, the guide rails of the Amaprop 1000 installation accessories must be secured against vibrations by means of a middle support fitted on site.
- In order to prevent any mechanical damage caused by the propeller, cable supports must be used for routing the power cable properly, i.e. without excessive slack.

Information on frequency inverter operation

- All submersible mixers from KSB are suitable for frequency inverter operation.
- The permissible control range is 25-50 Hz.
- In addition to any capacity reserves required for hydraulic reasons, a motor power reserve of 5 % must be provided when mixers are operated via frequency inverters.

Minimum level of fluid handled

Minimum level of fluid handled

The submersible mixer is operational when the fluid level is not lower than dimension W_T . This minimum level of the fluid handled must also be ensured during automatic operation.

During operation of the submersible mixer the general distance h_2 between the propeller tip and the water surface must be observed. Smaller h_2 distances are only permissible with KSB's written consent.

Please note that, even with a submergence of h_2 , air-entraining vortices may form, depending on the flow behavior of the fluid handled. Rough running of the submersible mixer resulting from the formation of air-entraining vortices is not covered by our warranty.

Minimum level of fluid handled

Size	h_1		h_2	
	[mm]	[inch]	[m]	[inch]
1000	8	0.2	30	0.75
1200 ... 2500	8	0.2	40	1

Standard and special designs

Standard and special designs

Option	Notes
Mechanical seal with covered springs	Available for all sizes
Power cable > 65 ft [20 m]	Available for all sizes
Leakage sensor in leakage chamber of mechanical seal	Available for all sizes of the UR version
Special voltage 575 V (design to CSA standard)	Available for all sizes
2-component epoxy resin coating 250 μ m	Available for all sizes
Additional operating manuals	Standard: 1 operating manual per pump set
Customer-specific installation drawing	Available for all sizes
Flow measurements	Available for all sizes
Flow simulation	Available for all sizes
Installation consultancy	Available for all sizes

For any versions not documented in this type series booklet always contact KSB for technical details, prices and delivery periods.

Examples:

- Other voltages
- Special coatings
- Combinations with special motor/special propeller/special gear unit (e.g. for higher-viscosity fluids)
- Special installation parts
- Special cables
- Tank

Technical data

Technical data of material variant G

Feature	Material variant	
	Amaprop 1000	Amaprop 1200 ... 2500
Explosion protection		
Version UR	-	
Version XR	 Explosionproof Class I, Division 1, Groups C & D, T3	
Motor		
Starting method	DOL or star-delta (up to 4.2 hp [4 kW]: DOL only)	
Voltage and frequency	460 V ²⁾ 60 Hz ³⁾ , suitable for frequency inverter operation	
Cooling	Cooled by surrounding fluid	
Immersion depth	Up to 36 ft [12 m] ⁴⁾	
Power cable		
Length	30 ft [10 m] ⁵⁾	
Cable entry	Absolutely watertight	
Type	Rubber-sheathed cable S1BN8-F	
Bearings		
Motor	Grease-packed rolling element bearings sealed for life	
Gear unit	Oil-lubricated rolling element bearings	
Gear unit	Spur gear	
Sealing elements		
Elastomer seals	Viton (fluorocarbon rubber FPM)	
Shaft seal	Bellows-type mechanical seal ⁶⁾	
Monitoring equipment		
Winding temperature	PTC resistors	
Motor leakage	Leakage monitor inside the motor	
Mechanical seal leakage	Optional: UR version only - leakage monitor in the leakage chamber	
Coating		
Permissible fluid temperature	113 °F [45 °C]	104 °F [40 °C]
Acceptance tests	To ISO 9001 ⁷⁾	
Installation		
Stationary	Installation depth up to 36 ft [12 m] ⁸⁾	

-
- 2) Optional: 575 V
 3) Other voltages on request.
 4) Larger immersion depths on request
 5) Optional: 45 ft [15 m], 60 ft [20 m]; > 60 ft [20 m] on request
 6) Optional: Mechanical seal with covered spring
 7) Optional: with test report 10204-2.2
 8) Larger installation depths on request

Accessories

Propeller fitting tool

Propeller fitting tool

Propeller with propeller fitting tool

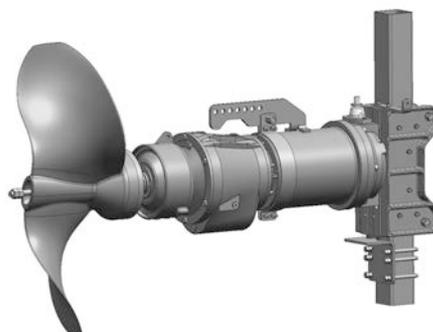

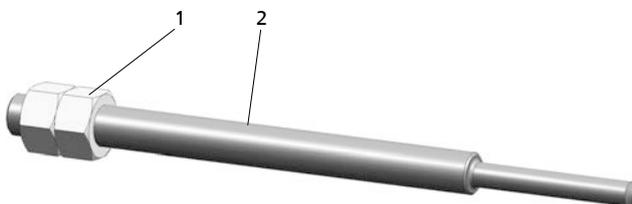

1	Hexagon nut
2	Disc
3	Threaded bolt

The propeller fitting tool facilitates mounting the propeller (23-9) on the shaft of the submersible mixer. Screw the threaded bolt into the shaft and position the propeller (23-9) on the shaft. Tighten the hexagon nut up to the stop to pull the propeller (23-9) onto the shaft.

Accessories: Propeller fitting tool

Description	Material	Material No.	[lbs]	[kg]
Propeller fitting tool for Amaprop 1000, Amaprop 1200 ... 2500	A 276 Type 316 Ti	01428379	2.69	1.22

Forcing screw

Forcing screw

Propeller with forcing screw

1	Hexagon nut
2	Forcing screw

The forcing screw facilitates dismantling. It helps remove the propeller (23-9) from the shaft of the submersible mixer. Remove the hexagon socket head cap screw (914.06) and disc (550.01) from the propeller. Screw the forcing screw into the forcing thread of the propeller (23-9) as far as it will go. The propeller (23-9) can now easily be pulled off the shaft.

Accessories: Forcing screw for the propeller

Description	Material	Material No.	[lbs]	[kg]
Forcing screw Amaprop 1200 ... 1801	A 276 Type 316 Ti	11306648	1.70	0.77
Forcing screw Amaprop 1000, Amaprop 2000 ... 2500	A 276 Type 316 Ti	11306649	2.31	1.05

Cable support / carabine hook

Cable support

The cable support is used for supporting the power cable at the lifting rope or tank edge (one included in standard scope of supply; additional or spare cable supports optionally available).

Lower holder, incl. 4 chemical anchors	A 276 Type 304	01118906	26.2	11.92
Lower holder, incl. 4 chemical anchors	A 276 Type 316 Ti	01118907	26.2	11.92

Middle support

Middle support for guide rail 4" x 4" x 3/16"
[100 mm x 100 mm x 5 mm] for large installation depths

Installation example: Amaprop 1000 mounted on tank edge and horizontal tank floor

1	Middle support
---	----------------

Middle supports per submersible mixer

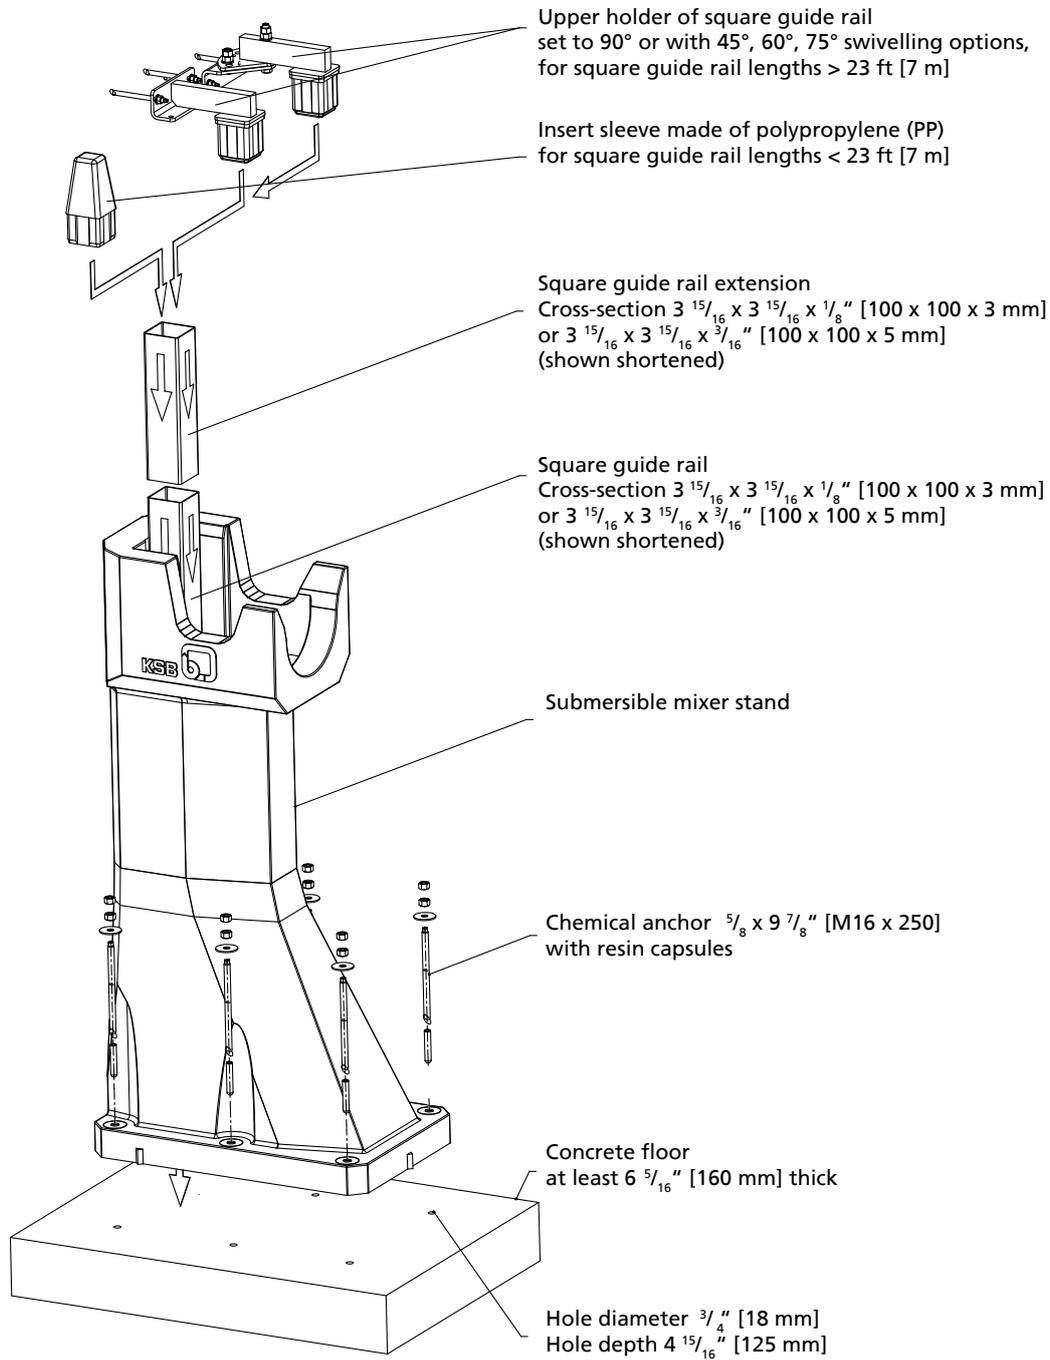

Submersible mixer	Middle support required
Amaprop ≤ 175-1000/ ...	From 26 ft [8 m]
Amaprop ≥ 181-1000/ ...	From 20 ft [6 m]

Standard accessories set 22 - Middle support for guide rail 4" x 4" x 3/16" [100 mm x 100 mm x 5 mm], for large installation depths

Description	Material	Material No.	[lbs]	[kg]
Middle support, incl. 2 chemical anchors	A 276 Type 304	01313462	42.5	19.26
Middle support, incl. 2 chemical anchors	A 276 Type 316 Ti	01313463	42.5	19.26

AmaRoc - accessories for Amaprop 1200 ... 2500

General assembly drawing showing individual components

General assembly drawing

Design details

Design

- Monolithic submersible mixer stand made of NoriRoc cast polymer concrete
- Integrally cast metal bushes (for fastening the stand to the tank floor) and flexible locating bushes (for holding the square guide rail)

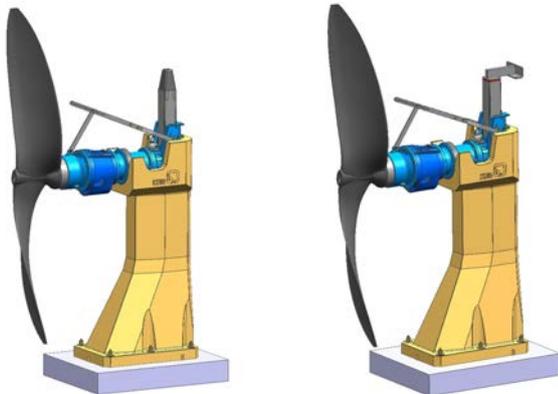

Fastening

- The submersible mixer stand is fastened on the tank floor with chemical anchors

Square guide rail

- Square guide rail, cross-section $3^{15/16} \times 3^{15/16}$ " [100 x 100 mm]; A 276 type 304 or A 276 type 316 Ti [material 1.4301 or 1.4571]
 - Wall thickness $1/8$ " [3 mm] (for square guide rail lengths < 30 ft [9 m])
 - Wall thickness $3/16$ " [5 mm] (for square guide rail lengths \geq 30 ft [9 m])

Installation

Installation variants

1. Free-standing, without upper holder (for square guide rails < 23 ft [7 m])
2. With upper holder mounted on the tank wall or bridge (generally required for square guide rails \geq 23 ft [7 m]; optional for square guide rail lengths < 23 ft [7 m])

AmaRoc

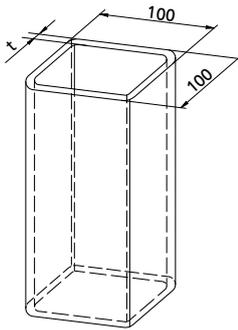

AmaRoc is designed for stationary installation on a horizontal tank floor, free-standing or with upper guide rail holder

AmaRoc standard accessories

Description	Description	Material	Material No.	[lbs]	[kg]
Submersible mixer stand	Shaft centerline height of submersible mixer 57 1/8" [1450 mm] above tank floor, incl. 6 chemical anchors	NoriRoc	01185967	880	410

Insert sleeve	Insert sleeve for guide rail 3 15/16" x 3 15/16" x 1/8" [100 mm x 100 mm x 3 mm]; for guiding the guide bracket onto the guide rail (free-standing installation without upper holder only)	PP (polypropylene)	11306484	1.8	0.8
Guide rail	(⇒ Page 30)				

Guide rails

The guide rail length required depends on the water level. Guide rails are supplied in standard lengths of 10 ft or 20 ft [3 m or 6 m]. Free guide rail ends should not protrude more than 20" [0.5 m] from the water. If an optional guide rail holder is used to support the guide rail on the bridge, the guide rail length must be selected accordingly. The guide rails must be shortened at the site as required. For larger installation depths, the guide rails must be extended by adding guide rail extensions with a length of 10 ft or 20 ft [3 m or 6 m]. Welding and subsequent treatment must be performed at the site in accordance with the relevant regulations. To allow smooth lifting and lowering of the submersible mixers, the weld seam at the outside of the guide rail must be ground down to a max. projection of 20" [0.5 mm].
